

The Truth About How Dominion Machines Relate To Smartmatic And Sequoia — Someone Is Lying

(Tea Party 247) – It's funny how, as soon as accusations of fraud and irregularities began to spring up surrounding Dominion Voting Machines, the press was completely satisfied with the denial of the election systems firm.

Dominion firmly denied that their machines were rigging the election—oh, well, in that case.

Nothing to see here, right?

As time has gone on and scrutiny has increased, Dominion has responded specifically to claims that they're related to Smartmatic and Sequoia machines, also denying this.

They've also denied that their machines can be connected to Wifi.

By all appearances, it appears that they're lying.

According to a thread on Twitter reported by The Gateway Pundit, there is in fact a connection between Smartmatic and Sequoia & Dominion voting machines.

In 2010, the now-notorious Dominion executive Eric Coomer (pictured at top), who has been accused of taking part in an Antifa conference call earlier this year in which he assured listeners he had "taken care" of the election, met with the California Secretary of State.

Coomer was there working for... Sequoia.

The Fake News Loves to say there is no connection between Smartmatic/Sequoia & Dominion. LIARS. In 2010 Eric Coomer attended a meeting with the CA Sec of State. He was there working for Sequoia –

Clearly, someone is lying.

Of course, someone is not being quite honest.

GA Testimony – Eric Coomer Started his Career in the Voting Business developing Code & Software for Sequoia in 2005. Smartmatic(Financed by Venezuela) purchased Sequoia the same year –

He also created the adjudication process that enable Dominion machines to switch votes from one candidate to another.

Eric Coomer has Patents on the Adjudication Process. Basically Coomer Created the entire Adjudication process for Dominion. The system is set up to go ONLINE🙄

What else are they lying about?

Why on earth would anyone who claims to be in the field of journalism accept the word of anyone at these companies as the evidence piles up against them?
